# WHY BUSINESSES CHOOSE CARHARTT

## DURABILITY

Carhartt is built to last for generations and engineered with materials to help crews perform at their best in any conditions.

## PERFORMANCE

Durable workwear helps keep crews protected and comfortable.

## EMPLOYEE RECRUITMENT & RETENTION

Carhartt gear drives employee satisfaction and pride, helping attract and retain talent.

## CUSTOMIZED SOLUTIONS

Through our comprehensive uniform programs, we outfit crews of 10 to 10,000+ in professional to rugged gear.

## BUSINESS IMAGE

A strong identity builds instant credibility with customers, turning crews into trusted experts.

## VERSATILITY

We offer men's and women's compatible styles in a wide range of sizes and assortments.

# DURABLE GEAR BUILT FOR BUSINESS

The gear you give your crew plays a critical role in the success of your company. Because durable, high-quality workwear does more than just protect. It helps reduce replacement costs, improve your image, boost morale, and retain skilled workers. Which is why, for more than 135 years, Carhartt has been the trusted choice of both trade professionals and the businesses that depend on them. For companies that put their crews first, Carhartt is more than a uniform. It's an investment in your people, your brand, and your bottom line.

## WE CAN SERVE YOU IN A VARIETY OF WAYS:

### BUY AS YOU NEED

Visit us online for your one-stop shop for customized Carhartt uniforms. Buy when you need it, as you need it, with embroidery or screen print options available. Plus free shipping.

Shop now at <https://companygear.carhartt.com>

### MANAGED UNIFORM PARTNERS

Need a managed uniform program?

Find a certified partner online at

# TECHNOLOGY & INNOVATION

Durable workwear should do more than last longer. It should help your crews work smarter. Carhartt technologies are engineered to do both. From sweat-fighting, fast-drying, flexible fabrics, to defense against rain, sleet, snow, or the sun's harmful UV rays, every innovation reflects our commitment to maximize comfort, protection, and performance.

## CARHARTT FORCE®

Lightweight performance workwear built to adapt to any condition and function in all seasons

### DURABLE WATER REPELLENT

Durable Water Repellent (DWR) technology forces water to bead up and roll off

### RAIN DEFENDER™

Durable Water Repellent (DWR) technology forces water to bead up and roll off

### STORM DEFENDER™

Waterproof, breathable technology stops water from getting in but lets sweat get out

### QUICK DUCK™

Repels the rain, resists the wind

### WIND FIGHTER™

Wind-proof technology locks in warmth

### FULL SWING®

Patented stretch technology provides greater range of motion

### RUGGED FLEX™

Built to stretch and flex with you as you move

### FORCE SUN DEFENDER™

UPF 50+ protection blocks 98% of harmful UV radiation

### UPF PROTECTION

Protection from harmful UV radiation

### FASTDRY™

Sweat-wicking technology keeps you cool and dry

### ANTI-ODOR

Anti-microbial technology prevents odor

# THE BEST GEAR CAN HELP RETAIN THE BEST EMPLOYEES

Durable, high-quality workwear does more than boost performance on the job site. It builds loyalty. Outfitting your crew in the right gear shows just how much you value them.

A recent survey found that 84% of workers said they are likely to stay loyal to their company a year from now when that business supplies them with Carhartt uniforms and workwear. Overall, the survey found the percentage of workers who said they were very or extremely likely to be with their companies a year from now increased when comparing workers who have partial or fully company-funded work clothing (76%) to those who pay for their own workwear (68%). Many factors come into play regarding reducing employee turnover, but the survey indicates uniform programs play a positive part.

When crews feel comfortable, protected, and proud of what they wear, they work harder and stick around longer. In a competitive market with a shrinking talent pool, that's more than a perk. It's a smart business strategy.

↑ Fin B. | Maschino & Sons Lumber

# MEN'S KNITS

BUILT FOR LONG DAYS, HARD JOBS, AND HIGH STANDARDS

# TOUGH JOBS ARE NO SWEAT

When temps climb, keep crews cool with Carhartt Force®. It's high-performance gear that keeps them dry, comfortable, and productive all day long.

# NO MATTER THE FORECAST YOUR CREWS ARE COVERED

Carhartt's advanced technologies are engineered to handle every environment. Whether it's lightweight layers for unpredictable mornings, extreme warmth for subzero temps, or waterproof protection for the heaviest downpour.

1

## **WARM**

Keeps crews working comfortably in cooler conditions.

2

## **WARMER**

Engineered to deliver midrange warmth for moderately cold days.

3

## **WARMEST**

Provides high warmth in severely cold conditions.

4

## **EXTREME WARMTH**

Vital protection for the absolute coldest temps.

## Ground Force Waterproof 6" Work Boot

Model No.	Composite Toe	CME6355
	Composite Toe	CME6351

### FEATURES

- Oil tanned leather upper
- Storm Defender™ waterproof breathable membrane
- FastDry™ technology lining wicks away sweat
- Molded rubber toe bumper with abrasion-resistant rubber heel
- Received the APMA Seal of Acceptance
- Carhartt LWD Lightweight Durable midsole with Insite® footbed
- Nylon shank
- Cement constructed with Carhartt rubber Ground Force outsole
- Defined heel with ladder lock
- Outsole heat rating testing up to 300 °C/572 °F
- Imported
- Safety Toe ASTM F2413-24 EH
- Slip Resistant ASTM F3445-24 SR

CME6355 - Red Brown (Composite Toe)

CME6351 - Black (Composite Toe)

MEDIUM 8 – 12, 13, 14

WIDE 8 – 12, 13, 14, 15

# CARHARTT FOOTWEAR

When your business has crews on their feet all day every day, you need more than gear. You need the top-notch comfort, support, and protection of Carhartt.

Like everything we build, Carhartt footwear is fortified with the long-lasting, rugged durability that hardworking feet depend on. Plus, every boot we build comes battle-tested and ready to be put through the roughest conditions you've got. Offering a wide range of styles and materials to meet your workers' needs, Carhartt boots are available with safety features including ASTM F2413-18 certified safety toe (I75/C75), electrical hazard (EH), static dissipative (SD), metatarsal (MT), and puncture resistance (PR). ASTM F2892-18 certified soft toe boots are also available for electrical hazard (EH) and static dissipative (SD). In addition, some styles offer heel guards to provide ankle stability and side-impact coverage. Wherever the jobsite—whatever it takes—our high performance, protective boots have you covered.

# LICENSEES

HEAD-TO-TOE PROTECTION WITH LICENSED PRODUCTS TO GIVE CREWS AND COMPANIES A LEG UP

Carhartt licenses the manufacture and marketing of certain products to other companies. For sales information, marketing materials, and product images for Carhartt-licensed products, please contact the company representatives listed below.

## CARHARTT WORK BAGS, PACKS, AND GEAR

Built on the mission to serve and protect all hardworking people, Carhartt and Signature Products Group have worked as one to forge packs, bags, and other gear-haulers that work as hard as you do. On the same crew since 2018, Carhartt and SPG create rugged, durable products beyond just head-to-toe solutions, across multiple accessory categories.

## CARHARTT GLOVES, BASELAYER, UNDERWEAR, FACE PROTECTION, AND SOCKS

Carhartt and Gordini have been partners in protection, offering the toughest, most work and weather-ready gloves on the market. Since 2010, Gordini has expanded their offerings in gloves to include base layer, underwear, and socks. Our gloves offer superior grip, dexterity, and breathability for top performance on any jobsite. Leveraging premium materials, exceptional fit, and innovative design for performance layering, our complete line of Carhartt Base Layer and Underwear offers next-to-skin comfort for hardworking men and women. Gordini is proud to bring our expertise in all-day comfort and durability to Carhartt Socks, with a range of heights and weights to keep feet warm and dry year-round.

# PROTECT YOUR GEAR

TREAT FR GARMENTS RIGHT SO THEY PERFORM AT THEIR BEST

## GET THE MOST OUT OF EVERY STITCH

### PROPER CARE

Follow the *manufacturer care instructions* located on the inside tag of each FR garment and these guidelines when home laundering your Carhartt FR:

- Wash garment with normal laundry detergent separately from non-FR garments in cold-warm water
- **DO NOT** use bleach (or detergents containing bleach/hydrogen peroxide)
- **DO NOT** use stain remover
- **DO NOT** use starch
- **DO NOT** use fabric softener/dryer sheets

### PROPER USE

Follow *your company's* safety requirements to determine the standards and calorie rating your garment must meet when working in hazardous areas.

- Carhartt recommends flame-resistant clothing be worn as base layers under FR garments
- Garments should have a reasonable fit with no modifications that will reduce effectiveness
- Prevent additional exposure to skin (keep garments buttoned and sleeves rolled down)
- Keep shirts tucked in when in a hazardous area
- **DO NOT** apply DEET to FR clothing — **DEET IS FLAMMABLE**

### USEFUL LIFE & REPAIRS

Regularly inspect your FR garments. Replace garments once they are past their useful life:

- Torn/ripped fabric
- Open seams/holes
- Fabric is frayed or threadbare
- Garment has been bleached
- Garment is soiled with flammable substances

Carhartt FR clothing can be repaired. The FR fabrics and FR-specific threads used for repairs should be equivalent in performance and FR characteristics to those used in the original construction of the garment.

**Carhartt FR is guaranteed flame-resistant for the useful life of the garment, provided manufacturer care instructions are followed.**

## WHAT IS A PPE CATEGORY?

A PPE category is a rating for FR clothing based on the arc protection rating that indicates the level of protection the garment provides. There are four PPE categories ranging from 1 to 4, with a PPE category of 1 representing the least protection, and a PPE category of 4 representing the most protection. The NFPA 70E consensus standard assigns these categories based on the electrical maintenance tasks to be performed, and each PPE category relates to a specific range of arc protection. For example, PPE category 2 would include arc ratings greater or equal to 8 cal/cm<sup>2</sup>, but less than 25 cal/cm<sup>2</sup>.

<b>PPE CATEGORY (CAT)</b>  <b>1:</b>  <b>4 CAL/CM<sup>2</sup> MINIMUM</b>	<b>PPE CATEGORY (CAT)</b>  <b>2:</b>  <b>8 CAL/CM<sup>2</sup> MINIMUM</b>
<b>PPE CATEGORY (CAT)</b>  <b>3:</b>  <b>25 CAL/CM<sup>2</sup> MINIMUM</b>	<b>PPE CATEGORY (CAT)</b>  <b>4:</b>  <b>40 CAL/CM<sup>2</sup> MINIMUM</b>

## 1 Who is Carhartt Flame-Resistant (FR) clothing designed for?

Carhartt FR clothing is designed for electricians and workers in the utility, oil, gas, and petrochemical fields who are at risk of exposure to electric arc flashes and flash fires, which could cause severe or fatal burn injuries. Typical candidates for FR clothing include electric lineworkers, pipeline and refinery workers, as well as industrial electricians.

## 2 How does Carhartt FR clothing help protect against burn injury?

Through the use of flame-resistant chemicals or fabric blends, Carhartt FR clothing is designed to self-extinguish within seconds after the source of ignition is removed, limiting the degree of burn and body burn percentage. It is not designed to be flameproof; it is flame-resistant.

## 3 Can the flame-resistant chemicals be washed out?

No. Carhartt FR clothing is guaranteed to be flame-resistant for the useful life of the garment regardless of the number of launderings, provided garment-care instructions are followed.

## 4 How can Carhartt FR clothing be distinguished from traditional Carhartt clothing?

Carhartt FR clothing is clearly identified with a "FR Carhartt" patch in place of the traditional Carhartt patch. Product hang tags and CAT labels also help distinguish Carhartt flame-resistant products.

## 5 What is an ATPV?

An Arc Thermal Performance Value (ATPV) is a rating assigned to flame-resistant clothing indicating the level of electrical arc flash protection provided. Higher-weight (e.g., thicker, denser) fabrics typically have higher ATPVs and provide increased protection (as does the layering of FR clothing). All Carhartt FR clothing has the ATPV marked on the inside label for easy reference.

## 6 What is EBT?

Like ATPV, Energy Breakopen Threshold (EBT) is a rating assigned to FR clothing indicating the level of protection provided. EBT is used when ATPV cannot be measured due to flame-resistant fabric breakopen. EBT is also measured in calories per centimeter squared (cal/cm<sup>2</sup>).

## 7 Can Carhartt FR clothing be repaired?

Yes, Carhartt FR clothing can be repaired, but repairs must be made with fabrics and sewing threads that have at least the same FR characteristics as the original garment.

## 8 Is flame-resistant thread required for embroidery applications?

None of the current regulations governing the use of flame-resistant clothing specifically requires the use of flame-resistant thread for embroidery applications. However, Carhartt recommends using flame-resistant thread for embroidery or emblem attachment.

## 9 Can I use DEET on flame-resistant clothing?

No. DEET is one of the most effective mosquito repellents on the market, but it should only be used on the skin, never on FR clothing. For the most effective mosquito and tick protection, use DEET-based repellents on the skin (especially on exposed skin) and use a permethrin (the active ingredient in most lice shampoos) product washed into or applied to flame-resistant clothing. These products do not add any appreciable flammability to FR clothing and therefore do not affect its flame-resistant properties. When using permethrin in a spray form, use the **WATER-BASED** formulas only. Propellants are almost always flammable in this application, so the powder form washed into the clothing or the **WATER-BASED** spray formula is recommended.

# AS REGULATIONS CHANGE, SAFETY STILL COMES FIRST

New OSHA guidance now requires more than 600,000 workers to wear NFPA 70E-compliant Arc Rated (AR) and Flame Resistant (FR) PPE to protect against arc flash hazards. With temperatures exceeding 35,000°F, arc flashes can cause severe burns and even fatalities. This is why Carhartt offers a full range of durable, compliant AR/FR apparel, from base layers to outerwear, to help protect crews working on or near energized electrical equipment.

- OSHA's new guidance expands AR/FR PPE requirements to a wider range of industries, including construction, manufacturing, utilities, and maintenance.
- NFPA 70E compliance ensures workers are protected from arc flash incidents with properly rated gear.
- Layering matters. Workers should avoid synthetic fabrics that can melt and should wear AR/FR underlayers and outerwear suited to their job's hazard level.
- Proper care extends protection. Following care instructions is critical for maintaining AR/FR effectiveness.

## OSHA General Duty Clause

- Employers are required to provide their employees with a place of employment that is free from recognizable hazards that are causing or likely to cause death or serious harm to employees.

## OSHA 1910.269

- Federal regulation that defines the safety practices of employees working in the generation, transmission, and distribution of electricity.
- Prohibits clothing that, when exposed to flames or arcs, could increase the extent of wearer injury. Employers must determine appropriate clothing based on an evaluation of potential hazards in the work environment. Clothing made from flame-resistant materials is acceptable under the rule; i.e., clothing that meets the requirements of ASTM F1506.
- The employer shall ensure that each employee exposed to potential hazards from electric arcs wears protective clothing and other protective equipment with an arc rating greater than or equal to the heat energy estimate whenever that estimate exceeds the heat energy of 2.0 cal/cm<sup>2</sup>.
- The 2014 revision to the regulation requires that as of April 1, 2015, employers must provide protective equipment sufficient to cover the employee's entire body.
- Acceptable FR clothing shall conform to the requirements of ASTM F-1506, and must have an appropriate arc rating (Arc Thermal Performance Value {ATPV} or Energy Breakopen Threshold {EBT}). The arc-rated clothing must be rated at or above the potential hazard from an arc flash exposure.

## National Electric Safety Code

- National Electrical Safety Code (NESC) sets rules for safeguarding personnel during installation, operation, or maintenance of electric supply and communication lines and associated equipment.
- The rule states that employers must conduct a hazard analysis to determine the potential arc exposure for employees working on or near energized equipment. Arc-rated clothing is required if exposure is greater than 2 cal/cm<sup>2</sup>.

## Standard for electrical safety in the workplace

- The NFPA 70E standard addresses electrical hazards in the workplace and supplements the NESC by focusing on protecting the worker from electrical hazards. The objective of this standard is to provide protection to workers based on the potential electrical exposure energy to which they could be exposed. NFPA 70E mandates that employers conduct a hazard risk assessment to determine the potential arc exposure for employees who work on or near energized parts or equipment.
- NFPA 70E requires that employees wear proper arc-rated flame-resistant (FR) clothing whenever there is a possible exposure to an electric arc flash event sufficient to cause a second-degree burn. Such FR protective clothing must be rated for protection from electric arcs so they can be properly matched to the appropriate hazard levels. This arc rating, either ATPV or EBT, appears on the labeling of our protective apparel for easy referencing. Matching the arc rating of the flame-resistant apparel with the hazard rating helps improve worker protection against the chance of serious burn injury or death.

## Standard on the fundamentals of combustible dust

- The NFPA 652 standard provides the general requirements for managing combustible dust fire and explosion hazards. It states that when FR clothing is required, it must comply with the requirements of NFPA 2112 and be selected, procured, inspected, worn, and maintained in accordance with NFPA 2113.

## Standard on flame-resistant clothing for protection of industrial personnel against short-duration thermal exposures from fire

- The NFPA 2112 standard provides minimum requirements for the design, construction, evaluation, and certification of flame-resistant (FR) clothing for use by industrial personnel exposed to potential flash fire situations. It does not attempt to provide any guidance on matching the PPE to the quantified hazards; that is what NFPA 2113 is designed for.

## Standard on selection, care, use, and maintenance of flame-resistant garments for protection of industrial personnel against short-duration thermal exposures from fire

- The standard provides minimum requirements for the selection, care, use, and maintenance of flame-resistant garments compliant with NFPA 2112 for use in potential flash fire situations. This standard reduces the potential risks caused by incorrect maintenance, contamination, or damage to FR clothing.

## American National Standard for high-visibility safety apparel and accessories

- ANSI/ISEA 107 provides performance requirements for conspicuous materials to be used in high-visibility safety apparel (HVSA) and specifies minimum amounts of background, retroreflective, and combined-performance materials. The 2020 edition continues to present three performance classes of garments based on the amount of visible materials and design attributes incorporated into the final garment configuration. The standard now identifies garment types based on expected use settings and work activities being performed. These are designated as off-road (type O), roadway and temporary traffic control (type R), or public safety activities (type P).

## ASTM F1891 – Standard Specification for Arc and Flame-Resistant Rainwear

- This specification establishes applicable test methods, minimum physical and thermal performance criteria, a suggested sizing guide, and suggested purchasing information for rainwear for use by workers who may be exposed to thermal hazards of momentary electric arcs and open flames.

## ASTM F2733 – Standard Specification for Flame-Resistant Rainwear for Protection Against Flame Hazards

- This specification establishes applicable test methods, minimum physical and thermal performance criteria, a suggested sizing guide, and suggested purchasing information for rainwear for use by workers who may be exposed to thermal hazards of momentary electric arcs and open flames.

Layered testing is the only way to determine the total arc rating for layered FR garments. Carhartt has conducted layered testing for a variety of combinations, using some of our most popular FR clothing styles. The resulting layered arc rating of the various combinations is listed in the table below for your reference.

Carhartt FR Fabric Outer Layer	Style Reference #	Outer Layer Solo ARC Rating	Carhartt FR Fabric Inner Layer	Style Reference #	Inner Layer Solo ARC Rating	Combined Layered ARC Rating
7-ounce, 88% cotton/ 12% high-tenacity nylon FR twill	FRS160	8.6 cal/cm <sup>2</sup>	6.75-ounce, 100% cotton FR jersey knit	100234 100235 100237 102685	8.9 cal/cm <sup>2</sup>	ATPV = 30 cal/cm <sup>2</sup>

Some styles come in sizes that don't work with the majority of customers. So when one or more of these non-stock sizes is needed, they require longer lead times (typically 8-10 weeks), freight charges, order increments (by style multiples of minimum order number), and an "ALL ORDERS FINAL" return policy (no returns outside manufacturer defect). For more information on placing a custom order, call Customer Service at 800-786-3916. Orders can be placed by email at CYC@carhartt.com or by faxing them to 800-217-2895.

We have updated our sizing charts to more accurately reflect the body standards we build our product to fit, removing ambiguous ranges. The body standards we build product for have not changed, nor has the product. The information update will help to better navigate the Carhartt sizing systems and products. The additional body measurements given will set expectations for all consumers on how the bodies we designed the product for might vary from their own, including those wanting or needing to purchase across gender.

## MEN'S BODY MEASUREMENTS

Our Men's Alpha-sized, Regular Length products are built for a body that measures::

	XS	S	M	L	XL	2XL	3XL	4XL	5XL	6XL
Numeric waist equivalent	26	30	34	38	42	46	50	54	58	62

Measurements in chart in inches

**Chest:** Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

**Arm Length:** Measure from the center back base of the neck, over the shoulder and down the arm to the wrist bone.

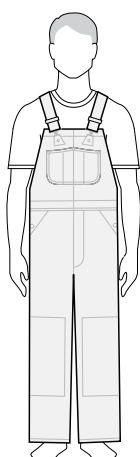

**Natural Waist:** Bend side to side and find the natural bend in your body; this is your natural waist. **Note:** It may not be the smallest point.

**Hip/Seat:** Measure the fullest point between your natural waist and crotch.

**Thigh:** Measure around one thigh at the widest point.

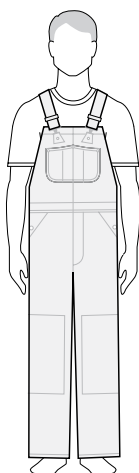

**Inseam:** Measure from where the leg meets the body, to the bottom of the ankle bone.

For best results, measure over your undergarments.

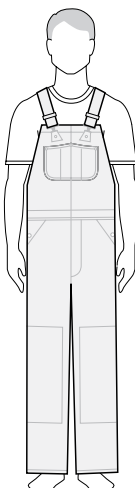

**SHORT**  
5'6-1/2"

Typically purchases  
30" inseam

**REGULAR**  
5'10-1/2"

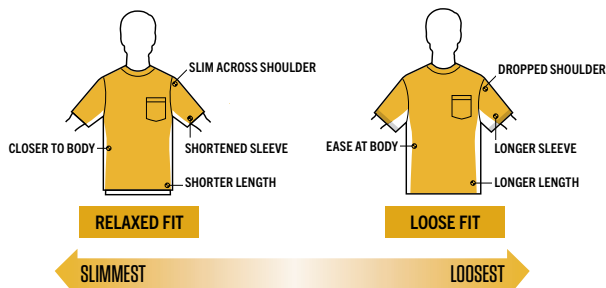

Typically purchases  
32" inseam

**TALL**  
6'2-1/2"

Typically purchases  
34" inseam

## CARHARTT WOVEN HATS AND CAPS: SIZE RANGES BY HEAD CIRCUMFERENCE

Size Range	Head Circumference (inches)	Head Circumference (cm)
Adjustable Ball Caps		
Men's One Size (OS)	22" to 23-3/8"	56 to 59 cm
Women's One Size (OS)	21-1/2" to 22-7/8"	55 to 58 cm
Sized Ball Caps		
Cap S/M	21" to 21-5/8"	53 to 55 cm
Cap M/L	21-3/4" to 22-3/8"	55 to 57 cm
Cap L/XL	22-1/2" to 23-1/8"	57 to 59 cm
Cap XL/XXL	23-1/4" to 24-3/8"	59 to 62 cm
Bucket and Boonie Hats		
Hat S/M	21-3/8" to 22"	54 to 56 cm
Hat M/L	22-1/8" to 22-3/4"	56 to 58 cm
Hat L/XL	22-7/8" to 23-1/2"	58 to 60 cm

## HOW TO MEASURE

**Bust:** Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

**Arm Length:** Measure from the center back base of the neck, over the shoulder and down the arm to the wrist bone.

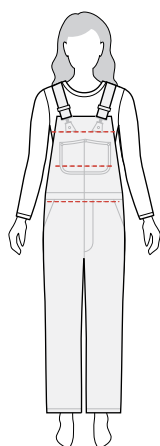

**Natural Waist:** Bend side to side and find the natural bend in your body; this is your natural waist. **Note:** It may not be the smallest point.

**Hips:** Measure the fullest part of your hips, approximately 8" below the natural waist.

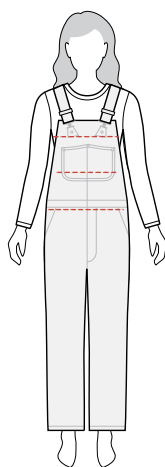

**Inseam:** Measure from where the leg meets the body, to the bottom of the ankle bone.

For best results, measure over your undergarments.

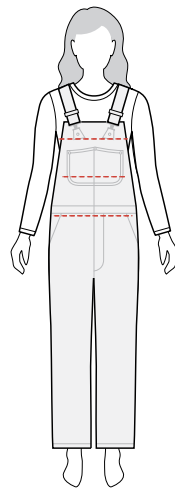

## HEIGHT CHART

Men's Carhartt Top Size Equivalent	XS - S	S	S - M	M	L	XL - 2X	3X

Measurements in chart in inches

The men's tops on a women's body will often appear looser on the body through the shoulders and be more snug through the hips.

Men's regular length product is built for a body that is 5'10-1/2" tall with a 31-1/2" inseam.

## BOTTOMS

Women's Carhartt Numeric Pant Size	2	4	6	8	10	12	14	16	18	20

Women's Carhartt Numeric Pant Size	22	24	26
Women's Waist (Body Measurement)	44-3/4"	47-1/4"	49-3/4"
Women's Hip (Body Measurement)	52-1/2"	55"	57-1/2"
Men's Carhartt Pant Size Equivalent	50	52 - 54	56

Measurements in chart in inches

This conversion is based off the women's hip measurement instead of the waist since the garment has to fit over the largest part of the body.

Note that the waist will likely gape if a woman purchases a men's jean and she has a similar or smaller waist measurement than shown on the chart. Men's pants are built for a body with a 5" difference between the natural waist and fullest point of the hip.

Men's regular length product is built for a body that is 5'10-1/2" tall with a 31-1/2" inseam.

Measurements in chart in inches

This conversion is based off the natural waist measurement.

Note that the hips/seat may fit large as Carhartt's women's body standard has a bigger waist-to-hip ratio than our men's body standard.

Women's regular length product is built for a body that is 5'5-1/2" tall with a 29-3/4" inseam.
